

Mackay Junior Soccer Association, Donation of Shade Structures

Woollam Constructions is presently building a number of timber shade structures and seating at the Junior Soccer grounds.

The project includes the erection of four shade structures that will provide shade and protection from the weather for players and spectators.

Woollam directors say another two shade structures are on the way down the track.

In addition, the inset photo shows two students who have since been awarded carpenter apprenticeships with Woollam's.

"Woollam Constructions, a major local construction company, approached Mackay Junior Soccer about providing timber shade structures to our soccer fields. Obviously we were extremely delighted by their in-kind offer and very quickly accepted. Their donation is testament towards their Mackay community dedication and the end results have certainly exceeded our expectations. The structures will provide protection from the sun for a large number of our junior players, parents and spectators alike.

To know that this project has also assisted the training of young people in the construction industry is an added bonus and the fact that as a result, two participants have been offered real apprenticeships is tremendous. This work has proven Woollam's is looking after sporting organisations and taking an active role in giving back to the local community."
